### HARRISON

Calvary Community Church Notes  
So far the July audiences have shown a substantial gain in size over previous years. The Church School has been fortunate in having the help of representatives from Camp Harvey and the Reverend Cassandra Sampson of Tilton, New Hampshire. At the service, July 13, Mr. Breakever of Austin, Texas, rendered a vocal solo. The church is glad to announce that Miss Harding will sing next Sunday.

The mid-week union meetings with North Bridgton are proving deeply devotional, made particularly inspiring by the hearty singing of the great hymns of the church. The study of the constitution of Calvary Community Church is arousing considerable interest. Every one is urged to attend and learn exactly what this progressive movement is trying to accomplish.

### Alfred Libby

One of the oldest citizens of the town, Alfred Libby, passed away at the Soldiers' Home in Augusta, Monday, July 13, at the age of 98 years, 2 months and 1 day. He was born in this town and had at various times lived here until a few weeks ago when he went to the Soldiers' Home.

His wife died about a year ago and he leaves only nephews and nieces. He was a soldier in the Civil War and received an honorable discharge from the service.

Mrs. Gertrude Haggood and daughters called on Mrs. Fred Gorman of Hunt's Corner, one day last week.

### A LEGEND OF PAPPOOSE POND

In a sunny valley where birds sweet echoes  
Through the forest glades beyond  
Lies the "Pearl of Waters," a tiny silver lake  
Bordered by ferns and flowers.  
It lies like a gem in its emerald rim  
With the hills and hills just beyond.  
Here "Indian Pudding" grows the scene,  
Where the forest floor is green  
With mums low. The bright waves go  
vocal solo. The church is glad to announce that Miss Harding will sing next Sunday.

It was long ago I was born,  
But now the story I'll tell  
Through the hills and hills just beyond.  
This of this lake in the sunny dell  
'Tis said that the Indians here  
And threw them into the water below  
When the shadows of night grew long,  
They danced a war dance over him  
In paint and feather they would gather  
On the shores of Pappoose Pond.  
And if by chance the child should swim,  
Next morn' the sun had devoured  
They danced a war dance over him  
In paint and feather they would gather  
On the shores of Pappoose Pond.  
Where many a various mound  
The level of the meadows break  
From near and far, where shadows creep  
And here they sleep, where shadows creep  
But now the story I'll tell  
Bought by the white man's hand,  
The fair green shores around  
Peeps from a cosy cottage, fair,  
Dainty and trim, with the sheltering limb  
Of tall pine trees there.  
Sending their fragrance up to Him  
Who has them grow in beauty fair  
Around the shores of Pappoose Pond.  
Pappoose, keep forever thy sweet name,  
Keep thy beauty ever the same  
Long the lasting hills beyond.  
By gentle breezes, whispering food,  
By glorious rainbow hues adorned  
Ever filled the dale, a gleaming veil  
Born of the wild, an Indian child  
Beautiful, beautiful Pappoose Pond.  
—By Lydia Lord Sheard.

### RECREATION IN A HOUSE ON WHEELS

T. H. Rodman and wife with a residence on Long Island, N. Y. arrived in town Friday to try the bass in Lake Penesseewassee.

They travel in a home of solid oak built on a Reo Speed Wagon chassis, and have all the conveniences in compact form. The auto cottage has two rooms provided with heat, hot and cold water, lights, kitchen equipment, ice chest, compact range, radio outfit, in fact about everything necessary for camp comfort while hunting and fishing. They have been easting the fly at Rangeley, Moosehead, Sebago, and arrived here from Haines Landing, after learning that Lake Penesseewassee is not too bad for game fish. Capt. Mel Sampson had the visitors in town during their stay.

Mr. Rodman is a noted breeder of fox hounds, beagles and setters and works almost entirely for bench shows, although he has trained many dogs for practical field work. He carries one setter named "Sister" on the trips. The dog is a fine type of the breed and lacks but a few points of a perfect score. Five hundred dollars could not buy this animal.

Mr. and Mrs. Rodman are in the sport-bagging game for recreation and health. They follow the hunting season South in the Fall and work North as the lakes open in the Spring. They have traveled extensively through the West and find life at least half the year in a movable cottage, is an ideal experience.

Mr. Rodman belongs to the army of radio fans. In fact the mechanical part is one of his hobbies and while shut in the car during winter he improves the hours building receiving sets, just for the fun of exercising his hobby. The seven tube set installed in the bus is his latest work and a number of receivers have been built and tucked away in compartments, are waiting for wet weather.

The outfit headed for New York state Saturday morning. The Rodmans had no objection to being expected to visit acquaintances along the route, possibly trying another cast at Lake

## 24 Hours Every Day-

### A good foundation for dividends

Stores close on Sundays, and so do banks,

The grocer says, "We have some ordered,"

The merchant can shut up shop and move away,

The manufacturer may retire,

Industries close down for slack periods,

But the power company, serving all the people all the time with all the electric energy they can use, never closes down, never moves away.

And because it is serving all the people all the time with a product they are never willing to do without—lights and power—its earnings come steadily in. Steady and adequate earnings mean steady dividends.

When you buy 7 per cent. Preferred Stock of Central Maine Power Company you know you are making an investment that has paid dividends with 100 per cent. regularity for more than 19 years. Its 75th consecutive dividend was paid out July 1 to 12,676 partner owners.

We believe it always will pay dividends.

If you want the solid comfort that comes from a solid investment, place some of your earnings in the 7 per cent. Preferred Stock of Central Maine Power Company.

At least send in the coupon and let us mail you more details about this Company and its security.

## "MY NEIGHBORS KNOW HOW MUCH I SUFFERED"

Was Never More Surprised  
in Her Life Than At  
The Way Karnak Helped  
Her, Says Monroe,  
Me, Woman.

Everyone now seems to be praising Karnak, the sensational new medicine.

Mrs. A. G. Larby, of Monroe, Me., who is very active in community affairs and wife of one of the most extensive farmers in the district, declares:

"I couldn't do otherwise than praise Karnak. Early last summer my right arm became so painful that I lost the use of it completely. Every move I made was simply torture. I couldn't pick up a dust cloth with it, and if I even moved

in the least bit it made me cry out with pain. My digestive organs were in terrible condition also and caused me much suffering from gas and constipation. I could never get a good night's sleep, and mornings I just felt worn out to start the day.

"I was never more surprised in my life than I was at the wonderful way in which I improved when I began taking Karnak. In a week's time I could move my arm without pain. I am no longer bothered with indigestion, gas or constipation, sleep sound and restful at night and feel like a different person. I can never praise Karnak enough for all it has done for me."

Karnak is sold in Norway exclusively by Frank P. Stone; and by the leading druggist in every town.

#### AMATEUR NIGHT AT THE REX

Local talent had the right of way at Rex Theatre, Monday evening, after the first run of pictures, and packed the theatre to capacity. The acts went with Billy White announcer and master of ceremonies.

"Bunk" Goodwin and Emery Wentzel opened with a novelty turn with "Bunk" in acrobatic stunts and Young Wentzel showing a nimble pair of feet for clog dancing.

Charlotte Longley gave a reading in her pleasing manner.

Irving Joslin, the boy vocalist rendered an attractive number with Edith Joslin at the piano.

Rita Shaw of South Paris in fancy costume entertained with a group of popular songs while accompanying herself on a lute.

Elmer Bartlett appeared as a vocalist and was popular with the audience.

The organ grinder who toured the streets during the day accepted the invitation to appear in the spotlight. He ground out two selections and sang a long winded song in a dialect said to be Italian. Probably few in the crowd knew what the songster was getting at.

Alvin White introduced the artist as "Boomerang" right from Broadway, and the name was well applied. The act was a trifle boreish but some person driving nails behind the scenes slapped on a rug.

Frederick Marshall Davis, poet, painter, musician and constable closed the program with jokes, songs and banjo picking. Frederick is ever popular and kept the crowd in a happy mood.

Four prizes were awarded in accord with the volume of applause. The performers were lined up for the purpose of elimination, with the audience the jury. "Boomerang" was awarded first prize (a night's lodging); Irving Joslin, second; Goodwin and Wentzel, third; Miss Elmer Bartlett, fourth. All but the Broadway Curcio received cash.

Another program will be given on July 27 and local talent can find a chance to exhibit their stuff by making arrangements early at this theatre.

The selectmen have posted signs warning bicyclists off the sidewalk.

Mrs. Eubanks Carner of Riverside, California, is visiting her aunt and uncle, Mr. and Mrs. Fred Rowe of Norway.

Mrs. Carner, formerly of Maine, of Norway, was graduated from Leland Stanford Junior University in 1915. Miss Maine has the honor of being elected to membership in Phi Beta Kappa, the national honorary society.

Later she was married to Dr. Eubanks Carner of the University of Wisconsin. Dr. Carner is stationed by the federal government at the University of California Citrus Experiment station, Riverside, California, where he is engaged in scientific research. Mrs. Carner will remain in the east visiting relatives during the summer months.

Mrs. Carner and her husband, Dr. Carner, are at Covington, York, England. They had a pleasant voyage across and report a wonderful time. They will return in the early autumn to South Paris where Mr. Carner will resume his pastoral labors with his church society.

## Now-a One-Profit Car in the Quality Field

STUDEBAKER has achieved one-profit manufacture in the quality field. This marks a new era in the automobile industry. Studebaker's achievement eliminates unnecessary profits running up to \$500 on a single car. It banishes double overhead. It results in quantity production of quality cars. It vitally affects pricing by establishing a new criterion of value in the fine car field.

### TWENTY-FIVE

years ago practically all "manufacturers" of automobiles were nothing more than assemblers.

They purchased motors, bodies, tops, axles, etc., from parts makers who were the manufacturers in reality.

On this basis it was easy to become an automobile "manufacturer" and more than five hundred makes of automobiles have had their day in the American market and have disappeared.

They are represented only by "orphan cars" with practically no resale value.

Notwithstanding this writing—Studebaker alone—now offers the American public one-profit value.

In the fine car field Studebaker—and Studebaker alone—now offers the American public one-profit value.

During the past seven years, when demand exceeded supply, Studebaker has been plowing earnings back into plants and machinery until we are now able to make this announcement.

Foundries, stamping mills, machine shops, are now complete. As final links in the chain of one-profit production, the enormous Studebaker body plants have been operating for months at peak capacity. Resources totaling one hundred million dollars are concentrated on the production of this one-profit car.

No other individual manufacturer in the world (except Ford) possesses such facilities for the complete manufacture of automobiles.

That is why Studebaker is able to put finer steel, finer wood, finer upholstery, better workmanship, hundreds of thousands of miles of re-

serve transportation, into every car—yet keep down the price to you.

This sound manufacturing principle not only holds down price, but it insures a better car regardless of price. The car is not a patchwork, but a unit.

Last year at the New York and Chicago automobile shows four well-known automobile manufacturers exhibited coaches mounted with the same body—a body made from the identical dies, jigs and fixtures. Certainly these manufacturers must have sacrificed engineering advantages in chassis construction to accommodate this "standardized" coach body built by an outside supplier.

Contrast this with Studebaker, where the entire car is designed and built as a unit—and engineered complete. This construction means (1) longer life—(2) greater comfort in riding—(3) greater freedom from repair expense—(4) greater resale value.

With the advent of this one-profit one-coach plan of motor car manufacture, it is folly today to buy a car by the same comparisons you used yesterday. Today you must measure all cars with this "one-profit" Studebaker.

One-fourth of all American passenger cars built today belong in the fine car field—a total of 27 different makes selling above one thousand dollars.

There are 21 Studebaker body styles available on three different chassis. The Standard Six Models, 113-inch wheelbase, 30 h.p. engine, \$1125 to \$1600 f.o.b. factory. The Special Six Models, 120-inch wheelbase, 65 h.p. engine, \$1450 to \$2120 f.o.b. factory. And the Big Six Models, 127-inch wheelbase, 75 h.p. engine, \$1875 to \$2650 f.o.b. factory.

And you may buy your Studebaker today with the assurance that it will not be arbitrarily stigmatized by any act of ours as a "last year's model." Instead of spectacular annual announcements of "new year models," Studebaker has adopted the policy of keeping its cars up-to-date in body styles and chassis design every day in the year. Therefore, buy your Studebaker now!

### Why Studebaker is the "one-profit" car

There are more than 60 makes of passenger cars built in the United States, but very few are manufactured complete in the plants of the producers who sell them.

Only 42 build all their own motors—and one of the 42 is Studebaker.

Of the 42 which claim to make their own motors only 14 make the iron castings, stampings and forgings which go into their motors—and one of the 14 is Studebaker.

Only 5 make all their own bodies and one of the 5 is Studebaker.

Only 2 make all their own motors, bodies, clutches, springs, axles, gear sets, differentials and steering gear. One of these 2 is Studebaker and the other is Ford.

Contrast this with Studebaker, where the entire car is designed and built as a unit—and engineered complete. This construction means (1) longer life—(2) greater comfort in riding—(3) greater freedom from repair expense—(4) greater resale value.
